LOG 203 - RELIABILITY AND MAINTAINABILITY

LOG 203	Competency	Yes	No	Work Description/Justification
1	Describe what reliability can mean from the perspective of an operator, maintainer, or engineer.			
2	Describe the interrelationships of reliability and maintainability (R&M) and supportability.			
3	Describe how user requirements are translated into qualitative and quantitative R&M parameters.			
4	Describe the capabilities and limitations of R&M predictions in developing support requirements.			
5	Describe the relationship between R&M testing and risk management.			
6	Describe how manufacturing variability reduction effects field reliability.
